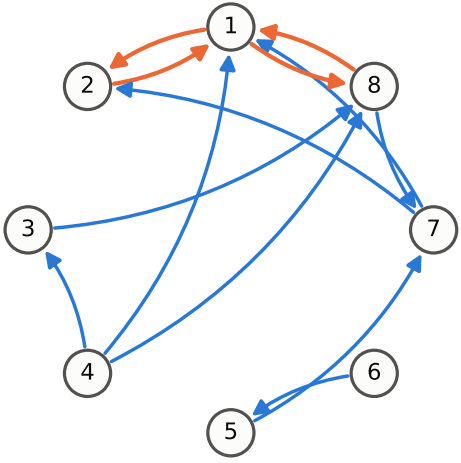
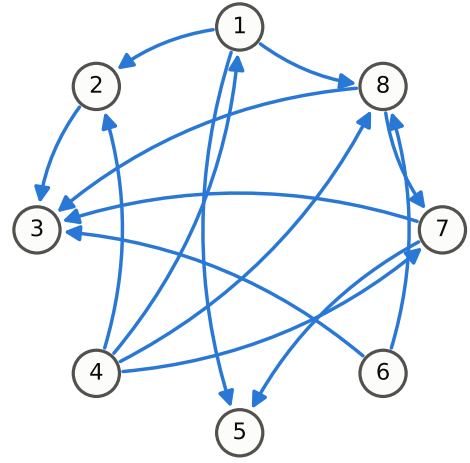
one seed (3), p = 8, k = 2: the graph classes of the generator

random: every ordered pair
with probability d = k / p



13 edges, 2 two-cycles: class with 2-cycles
identified on its support: yes

dag: a fresh draw, edges only
along a random order of the nodes



14 edges, 0 two-cycles: class DAG
identified on its support: yes

single edge both directions of a pair (a 2-cycle)
